FOODS FOR RODENTS AND SMALL MAMMALS
**Tropifit** foods for small pets are the essence of professionalism, experience and high quality. Carefully balanced and diversified food is the foundation of your animal’s excellent health. Tropifit products have been categorized into two lines: **Tropifit Standard** – universal basic foods for popular rodents and dwarf rabbits and **Tropifit Premium** – matched to the needs of specific species of rodents (hamsters, guinea pigs, mice, rats, gerbils, degus, chinchillas), rabbits and demanding pets such as ferrets and hedgehogs.

**5 Reasons to choose Tropifit products:**

1. High quality granules, which reduce selective feeding.

2. Production of granules, using modern extrusion technology, which increases assimilability of ingredients.

3. Natural ingredients, including dried grains, fruit and vegetables derived from reliable crops.

4. Properly balanced ingredients.

5. Hermetic packing, using inert atmosphere, to protect food from oxidation and pest invasion.
<table>
<thead>
<tr>
<th>INGREDIENT</th>
<th>WHAT IS IT RESPONSIBLE FOR?</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Alfalfa</strong></td>
<td>Granulated alfalfa is the source of vitamins: B, C, D, E, P and K, mineral salts such as potassium, iron, calcium, magnesium, manganese, silicon and phosphorus. An exceptionally high content of chlorophyll prevents alimentary tract disorders.</td>
</tr>
<tr>
<td><strong>Chitin</strong></td>
<td>Chitin from natural sources regulates digestion.</td>
</tr>
<tr>
<td><strong>Granulated grass</strong></td>
<td>Grass from ecologically clean meadows provides valuable vitamins, minerals and fibre, which regulates digestion.</td>
</tr>
<tr>
<td><strong>FOS+</strong></td>
<td>Fructo-Oligo-Saccharides stimulate valuable intestinal microflora, which inhibits the development of pathogenic bacteria and enhances digestion.</td>
</tr>
<tr>
<td><strong>Inulin</strong></td>
<td>Jerusalem artichoke is the source of inulin, which is a natural prebiotic – stimulates valuable bacterial flora and facilitates its activity. Prevents diabetes, a common disease of degus.</td>
</tr>
<tr>
<td><strong>Omega-3 and Omega-6 acids</strong></td>
<td>Omega-3 and Omega-6 acids increase the resistance to diseases, ensure healthy and shiny fur, enhance growth and reproduction capability, and are building material of hormones playing important roles in animal’s organisms.</td>
</tr>
<tr>
<td><strong>Stabilised Vitamin C</strong></td>
<td>Guinea pigs do not synthetize vitamin C on their own, hence we must supply it in food. To make vitamin C added to our products more resistant to decomposition, we use its special, stabilised form.</td>
</tr>
<tr>
<td><strong>Taurine</strong></td>
<td>Taurine is an amino acid responsible for various functions including proper digestion of fats, cardiovascular function, function of the retina and central nervous system.</td>
</tr>

Tropifit Premium

HAMSTER

- Food for hamsters, with banana and high protein granulated alfalfa
- Granulated grains and alfalfa are obtained through extrusion, which increases digestibility and assimilability of the nutrients contained in grains and alfalfa, and eliminates bacteria and fungi existing in raw materials
- Size and shapes of the granules help hamsters’ teeth wear down and ensure proper oral hygiene
- Fructo-Oligo-Saccharides regulate digestion processes and stimulate intestinal microflora
- Special granules with meat are the source of valuable protein of animal origin
- Vitamins, macronutrients and trace elements from natural sources and Omega-3 and Omega-6 acids ensure soft, silky fur

Available packing units: doypack 500 g.

MINI HAMSTER

- Food for small breeds of hamsters (e.g.: Campbell’s dwarf hamsters, Chinese hamsters, Djungarian hamsters, Robos) and other small breeds of rodents (e.g.: mice such as zebra mice, spiny mice, African pygmy mice and gerbils) with granules, which contain the addition of apples, currant and alfalfa, rich in protein
- Granulated grains are obtained through extrusion, which increases digestibility and assimilability of the nutrients contained in grains, and eliminates bacteria and fungi existing in raw materials
- Size and shapes of the granules help hamsters’ teeth wear down and ensure proper oral hygiene
- Granules with beet, rich in Fructo-Oligo-Saccharides, and granulated grass facilitate digestion and stimulate intestinal flora
- Granules with chicken and crustaceans are the source of protein of animal origin, indispensable in small rodents’ diet, as well as chitin, which facilitates digestion

Available packing units: doypack 150 g.
**DEGU**

- food for degus with bark and twigs of fruit trees, which help degus wear down their continuously growing teeth
- granulated grains and alfalfa are obtained through extrusion, which increases digestibility and assimilability of the nutrients contained in grains and alfalfa, and eliminates bacteria and fungi existing in raw materials
- flaxseed is the source of unsaturated fatty acids — EFAs (including Omega-3 and Omega-6 acids, which ensure shiny fur)
- Jerusalem artichoke is the source of inulin, which stimulates intestinal flora and prevents diabetes — the most common disease of degus
- the addition of leek gives food an exceptional taste and aroma, which encourage degus to eat

Available packing units: doypack 400 g.

---

**RABBIT**

- food for rabbits, with carob pods and high protein granulated alfalfa
- granulated grains and alfalfa are obtained through extrusion, which increases digestibility and assimilability of the nutrients contained in grains and alfalfa, and eliminates bacteria and fungi existing in raw materials
- Fructo-Oligo-Saccharides and granulated grass regulate digestion and stimulate intestinal microflora
- size and shapes of the granules help rabbits' teeth wear down and ensure proper oral hygiene
- a variety of nutrients, vitamins, macronutrients and trace elements ensures excellent condition, healthy fur and energy necessary for everyday activities

Available packing units: doypack 500 g, bucket 1.5 kg.
RAT

- food for rats with sweet bananas, raisins and carrots
- granulated grains are obtained through extrusion, which increases digestibility and assimilability of the nutrients contained in grains, and eliminates bacteria and fungi existing in raw materials
- special granules with chicken are the source of animal protein – indispensable in rats’ diet – and valuable Omega-3 and Omega-6 acids from flaxseed
- dried fruit and vegetables as well as extruded granules, including granulated alfalfa, regulate digestion and help to wear down rats’ teeth
- a variety of nutrients, vitamins, macronutrients and trace elements ensures excellent condition, healthy fur and energy necessary for everyday activities

Available packing units: doypack 500 g.

CHINCHILLA

- food for chinchillas with carrot and beet
- granulated grains and alfalfa are obtained through extrusion, which increases digestibility and assimilability of the nutrients contained in grains and alfalfa, and eliminates bacteria and fungi existing in raw materials
- size and shapes of the granules help chinchillas’ teeth wear down and ensure proper oral hygiene
- a great choice of multi-ingredient granules prevents selective eating
- Fructo-Oligo-Saccharides regulate digestion processes and stimulate intestinal microflora
- a variety of nutrients, vitamins, macronutrients and trace elements from natural sources ensures excellent condition and beautiful fur

Available packing units: doypack 500 g, bucket 1.5 kg.
GUINEA PIG

- food for guinea pigs with carob pods and high protein, granulated alfalfa
- granulated grains with alfalfa and beet are obtained through extrusion, which increases digestibility and assimilability of the nutrients, and eliminates bacteria and fungi existing in raw materials
- Fructo-Oligo-Saccharides regulate digestion and stimulate intestinal microflora
- size and shapes of the granules help guinea pigs' teeth wear down and ensure proper oral hygiene
- a variety of nutrients, vitamins, macronutrients and trace elements from natural sources as well as the addition of Vitamin C ensure excellent condition, healthy fur and supply guinea pigs with abundant energy, indispensable for everyday activities

Available packing units: doypack 500 g, bucket 1.5 kg.

FERRET

- a complete dry food with chicken for ferrets
- optimally balanced ingredients and easily assimilable protein from chicken and fish ensure excellent condition and supply these exceptionally active animals with abundant energy needed for everyday activities
- algae and flaxseed (rich in Omega-3 and Omega-6 acids), vitamins and trace elements ensure healthy and glossy fur
- the addition of taurine enhances digestion and heart vitality

Available packing units: doypack 400 g.
ATELERIX

- A complete food with chicken and the addition of dried mealworms for African pygmy hedgehogs, four-toed, long-eared, North African, Southern African, Somali hedgehogs, and other
- Chitin from natural sources (crustaceans’ shells, mealworms) regulates digestion
- Beta-glucan and stabilised Vitamin C protect against diseases and increase the resistance to infections
- The size and structure of the granules are adjusted to hedgehogs’ small jaws and teeth
- Chicken meat and the addition of dried mealworms make the food exceptionally palatable and hence eagerly eaten by the hedgehogs
- Omega-3 and Omega-6 acids from salmon oil improve the condition of hedgehogs’ delicate skin

Available packing units: doypack 300 g, bucket 1 kg.

RODENT & RABBIT SNACK

- A tasty snack with healthy alfalfa for all species of rodents (including mice, rats, hamsters, guinea pigs, gerbils) and rabbits
- The size and shape of this snack have been designed to make sure that animals can easily hold the snack and wear down their teeth against its hard surface
- Zeolite and fibre facilitate digestion and the release of toxins from animal’s body while valuable vitamins, trace elements and macronutrients (including iodine from kelp algae) ensure rodent’s excellent condition
- This snack does not contain sugar

Available packing units: doypack 150 g.
**RODENT & RABBIT COCKTAIL**

- A complete composition of colourful granules intended for everyday feeding of all species of rodents (including mice, rats, hamsters, guinea pigs, gerbils) and rabbits.
- Granulated grains enriched with apples, sunflower seeds and maize are obtained through extrusion, which increases digestibility and assimilability of the nutrients contained in the grains.
- The size and varied shapes of the granules allow animals to wear down their teeth and keep proper oral hygiene.

Available packing units: bucket 1.1 kg, bag 15 kg.

**RODENT & RABBIT MIX**

- A composition of seeds and granules intended for everyday feeding of all species of rodents (including mice, rats, hamsters, guinea pigs, gerbils) and rabbits.
- Apart from cereals the food consists of granulated grains enriched with apples, sunflower seeds and maize, obtained through extrusion, which increases digestibility and assimilability of the nutrients contained in the grains.
- The size and varied shapes of the granules allow animals to wear down their teeth and keep proper oral hygiene.
- Zeolite and grass facilitate digestion.

Available packing units: bag 20 kg.
Tropifit Standard

HAMSTER

- a complete mixture of cereals and granules intended for everyday feeding of hamsters
- extruded, easily digestible granules have been enriched with grass which facilitates digestion
- the shape and texture of the granules help animals wear down their teeth and ensure proper oral hygiene
- vitamins, macronutrients and trace elements from natural sources are easily assimilated by hamsters and prevent their shortages

Available packing units: bag 500 g.

UNIVERSAL

- a complete mixture of cereals and granules intended for everyday feeding of rodents (especially rats, pet mice, Cairo spiny mice, Barbary striped grass mice and African Pygmy mice, gerbils and fat-tailed gerbils)
- extruded, easily digestible granules with grass and alfalfa are the source of high quality plant protein and fibre, which facilitates digestion
- the shape and texture of the granules help animals wear down their teeth and ensure proper oral hygiene

Available packing units: bag 500 g.
RABBIT

- a complete mixture of cereals and granules intended for everyday feeding of pet rabbits;
- extruded, easily digestible granules with grass and alfalfa are the source of high quality plant protein and fibre, which facilitates digestion
- the shape and texture of the granules help animals wear down their teeth and ensure proper oral hygiene

Available packing units: bag 500 g.

GUINEA PIG

- a complete mixture of cereals and granules intended for everyday feeding of guinea pigs
- extruded, easily digestible granules with grass and alfalfa are the source of high quality plant protein and fibre, which facilitates digestion
- the shape and texture of the granules help animals wear down their teeth and ensure proper oral hygiene
- food contains natural Vitamin C

Available packing units: bag 500 g.
